

Ideal de France

Shape the future in Paris region

*Born from the discussions with numerous students and young foreign professionals worried about the ecological questions and looking for ways to integrate this dimension in their lives, their studies or even their jobs, Ideal-de-France tries to list the networks, associations, but also formations and companies invested on the subject, while valuing the rich ecosystem of the Parisian region.*

## The Ile-de-France as a land of ideas, knowledge and action for a sustainable future

*The place for students to start building the ecological world of tomorrow in Paris region.  
What do we start with?*

I just want to **meet**  
**people and exchange**  
**ideas** in my spare time

I want to **get involved in**  
**a project** or an  
association

I want to **train or do an**  
**internship** and work for  
the planet
